

Forms Modernization Drives Logistics Provider to the Cloud

This logistics provider specializing in trailer leasing, rental, and storage sets high standards in its industry through superior customer service, top-flight equipment, and the use of innovative IT.

CHALLENGE

- Oracle Forms on-premise ERP needed review
- Needed to incorporate new business processes quickly
- Required better data visibility (reporting and data visualization)

PRIORITIES

- Extend Forms investment through modernization
- Reduce on-site infrastructure
- Improve reporting. Make it more flexible. Better data insights
- Reduce time spent on the overall billing process
- Reduce billing errors

RESULTS

Insum migrated their Oracle on-premise apps to the Cloud, used APEX to develop secure, high-performance dashboards, including Interactive Reports, and integrated real-time data (telematics) with in-house ERP data.

PROJECT STATS

Service: Forms Migration
Cloud Migration

Timeline: October 20' -
October 22'

Location: Canada
