Hi ,

A complete data model in minutes, a single APEX page that reports on an endless number of tables or views, and a \$100 Kscope discount.

This edition of our newsletter is full of ways that help you do way more with less!

Today's edition

- **New post:** Low code data modeling with QuickSQL
- **A 'legit' APEX tip** you won't want to miss
- **Community News:** Things that caught our attention in the Oracle APEX community.
- Grab your **Kscope22 discount code**
- **Upcoming shows:** See what's new this week on our Insum YouTube channel.

Low-code data modeling with QuickSQL

How many lines of code would you need to create 5 REST-enabled tables, complete with APIs, auditing columns, triggers, comments, a view, AND sample data?

[The answer](#) will DEFINITELY surprise you!

And while much has been said and written about the amazing low-code, 'app in minutes' capabilities of Oracle APEX, you may not yet know about all the ways QuickSQL can save you time and set you up for success.

[Read our latest post](#) to learn how QuickSQL will let you do way more with less. We've also got a handy [cheat sheet](#) for you!

One report to rule them all

[Anton](#) doesn't often tweet (much to this editor's chagrin). So you know that when he tweets 'this week's tip is legit', he must be pretty excited.

If you didn't catch last week's APEX Instant Tips live, [watch the replay](#) to see how a **single** APEX page can be used to report on an unlimited number of tables or views.

If that isn't doing more with less, we don't know what is!

Oracle APEX Community News
